DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 7-9, drawn to a method of making a packing crate, classified in class 493, subclass 84.
 - II. Claims 22-37, drawn to a container, classified in class 229, subclass 198.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the method claim require a folding over the strip at an edge of the stack of paper while the article claims does not require this step thus making the inventions I and II distinct. Furthermore, the container as claimed can be made by other method like immersing the threads with adhesive prior to sewing. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
